Hi Stan – 8am tomorrow morning is perfect. Area 40 location map is attached. Personnel can go directly to Area 40. We have not collected any Area 40 soil vapor samples yet, so we will ensure we wait for those locations until your team arrives. Please ensure your team follows COVID protocol (stay home if any COVID symptoms, masks covering both mouth and nose required at all times, maintain 6 feet separation).

Dan – correct me if I am wrong, but I believe the Radiello samplers will be deployed on Thursday.

Chris

Hi Chris, just checking on the schedule and coordination. We plan on coming out tomorrow to observe and collect split vapor samples. Would like to collect splits from 37B VW57 and 37B VW41. When do you anticipated collecting those? Are the ambient air samplers being placed on for Thursday or Friday? Where should our personnel go? None of my current personnel have been to Area 40 so some simple directions would be great. Thanks Stan

Hi Chuck – We are still planning on groundwater sampling occurring March 22-24. The soil vapor sampling needs to wait a few days after the rain event, so we may start either the 23rd or 24th. We will definitely be sampling on the 24th, so maybe that is the best day to plan for. The ambient air sampling will begin either the 25th or 26th.

Let me know if you need specific details. Chris

Chris,

Do you have more details on your plans for the sampling? I'd like to get Stan's folks out to do some split sampling.

Thanks,

Chuck

Subject: Area 40 Quarterly Sampling

Hi Everyone – Alex's email reminded me that I needed to let you know that Area 40 quarterly sampling (groundwater and soil vapor) will occur the week of March 22. Ambient air monitoring will begin on March 25/26 and go through April 8.

Please let me know if you plan on collecting split samples. Thanks, Chris
